

City of Sault Ste. Marie
Huron Street Sewage Pump Station Improvements
Class Environmental Assessment

Notice of Completion

The City of Sault Ste. Marie is proposing to replace the existing Huron Street Sewage Pump Station. The existing station is located on the west side of Huron Street south of Bay Street and it is approaching the end of its useful service life. Furthermore redevelopment of the area serviced by the station has been ongoing and is expected to continue in future years which may result in a need for increased station capacity.

Following the development and assessment of alternative solutions the preliminary preferred solution generally consists of the following:

- Construct a replacement pump station on vacant lands owned by the City on the east side of Huron Street and south of Bay Street and the CNR tracks.
- Size the replacement station to accommodate existing and possible future development or redevelopment within the service area.
- Include contingency measures to address potential power failures or full station failure.
- Incorporate appropriate controls for automated system functionality.

This project is being planned as a **Schedule B** project under the **Municipal Class Environmental Assessment Process (Class EA process)**. The Class EA process includes identification of problems and opportunities, evaluation of alternative solutions and designs, stakeholder consultation, assessment of potential effects on the environment and identification of reasonable measures to mitigate any adverse effects.

Public and external agency consultation is a key component of this Study. Subject to comments received as a result of this Notice and the receipt of necessary approvals, the City of Sault Ste. Marie may proceed with the design and construction of this project.

Interested persons should provide written comment to the Municipality or the Consultant via email or hardcopy at either of the addresses noted below within 30 calendar days from the date of this Notice.

If concerns arise regarding this project, which cannot be resolved in discussion with the municipality, a person or party may request that the Minister of Environment, Conservation and Parks make an order for the project to comply with Part II of the Environmental Assessment Act (referred to as a Part II Order), which addresses individual environmental assessments. Requests must be received by the Minister at the address below within 30 calendar days of this Notice. A copy of the request must also be sent to Catherine Taddo at the address noted above. If there are no requests received by May 17, 2019, the project may proceed to design and construction as presented in the planning documentation.

Minister of Environment, Conservation and Parks
135 St. Clair Avenue West, 12th Floor
Toronto, Ontario M4V 1P5

This Notice issued April 10, 13 and 17, 2019.
