SAULT STE. MARIE FIRE SERVICES

ORGANIZATIONAL CHART

FIRE CHIEF'S MESSAGE

On behalf of the Sault Ste. Marie Fire Service, it is my pleasure to present the 2023 Annual Report. Each day our committed team of professionals deliver exceptional emergency services to our community being guided by our Mission Statement – *"A proud partner within our community that provides exceptional service through prevention, education, protection and wellness"*.

This report will provide insight to assist in understanding the details of the services provided by the Sault Fire Services staff. The 2023 annual report highlights the call volume, types of responses, public education programs and inspections completed. From our wide range of emergency responses to our expanding fire prevention programs and public education initiatives, our team has consistently demonstrated resilience, professionalism, and a steadfast commitment to our mission.

Looking ahead to 2024, Fire Services will work towards being NG-911 compliant, progressing towards attaining mandatory certifications for Firefighter Training as per Ontario Regulation 343/22 and implementing the update to our Community Risk Assessment (CRA) and Fire Master Plan (FMP) as per Ontario Regulation 378/18. The CRA and FMP will provide Council with a framework and strategic planning for the next 5 to 10 years.

This report is not just a summary of statistics and events, it is a testament to the partnership between our service and the community we serve. I extend my gratitude to each member for their support, collaboration, and commitment in keeping our community safe.

Looking ahead, we are committed to building a sustainable fire service that maximizes efficiency and value for our city. Following the Fire Master Plan, we will strive to optimize our operations and maintain fiscal responsibility that results in a high-quality service while safeguarding the long-term health of our department and our community.

Thank you for your continued support.

Peter Johnson

Fire Chief

VISION

"Committed to Provide Effective and Efficient Emergency Service in a Caring Manner to Create a Safe Community"

MISSION

"A Proud Partner within Our Community That Provides Exceptional Service through Prevention, Education, Protection and Wellness"

VALUES

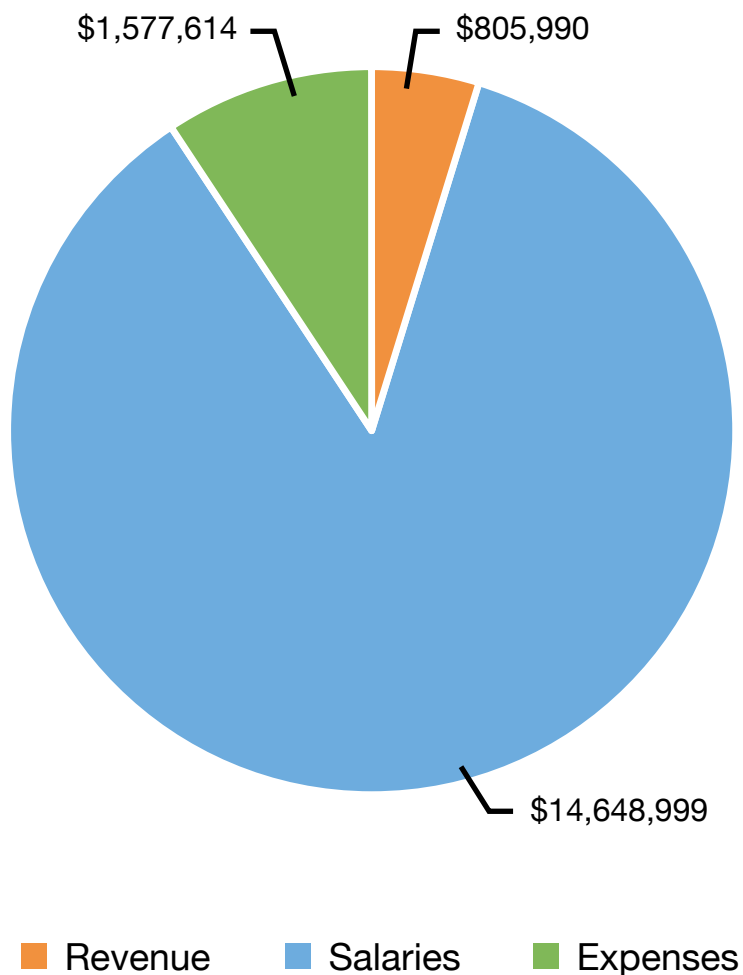

Public Safety, Employee Safety, Customer Service, Integrity and Honesty

FIRE ADMINISTRATION

The **Fire Administration** team is responsible for managing all divisions of Sault Ste. Marie Fire Services (SSMFS). It oversees and directs the day-to-day operations including current and long-range Strategic Planning, Capital and Operational Budgets, Fleet Management, Labour Relations and Policy Development. Sault Ste. Marie Fire Services continues to implement the approved Comprehensive Risk Assessment (CRA) and Fire Master Plan (FMP). The FMP was developed to provide the Mayor and Council with a strategic framework for the delivery of fire protection services. The FMP contains legislative responsibilities and industry best practices that are accompanied by recommendations to enhance the delivery of fire protection services for the community of Sault Ste. Marie.

2023 Fire Services Budget \$15,420,623

2023 FIRE STATISTICS

2023 Emergency Call Summary		Total Calls 2254
Injuries Reported	Civilian	8

PERFORMANCE METRICS - SSMFS Response Time

Response Time refers to the elapsed time between SSMFS “First Unit en Route” to the arrival of the “First Unit on Scene” of the emergency.

SSMFS Average Response Time in 2023 was 03:13min

SSMFS 90% of incidents maximum elapsed time	05:24min
SSMFS 95% of incidents maximum elapsed time	06:18min

FIRE PREVENTION & PUBLIC EDUCATION

Within the province of Ontario, the delivery of fire protection services is guided by the Fire Protection and Prevention Act (1997), including the strategic optimization of the three lines of defence which include:

1. Public fire safety education
2. Fire safety standards and enforcement
3. Emergency response (suppression)

The role of the **Fire Prevention & Public Education Division** is to enhance the first two lines of defence to lessen reliance on the third line of defence. Continuing this mandate is crucial to ensuring the safety of the citizens, business operations and visitors to our community. Annually, this division assesses fire risks in the community and develops education and enforcement strategies to mitigate the risks and improve the fire safety of residents.

Although fire incident rates are steadily declining, 'Class C-Residential occupancies' remain the primary building stock of concern. Additionally, cooking fires continue to be the number one cause of fires at home. As a result, focused public education and enforcement efforts targeted these occupancies, which resulted in increased community safety.

Public Education Programs – The First Line of Defence

In 2023, various public education methods including radio, television, social media, billboards and hanging sign boards were utilized. Additionally, "Project ASAP" has steadily gained traction, which is focused solely on seniors' fire safety. Additionally, staff completed 22 station tours and 244 fire safety demonstrations and lectures to local groups.

Of the many education opportunities, the following primary programs are implemented annually:

Elementary School Program

In 2023, the primary school program was delivered to grade 1 to 3 students and focused on the theme "*Fire Won't Wait – Plan Your Escape.*" The purpose of the program was to teach children the importance of developing an escape plan in their home ahead of a fire and practicing it. This way, in the event of an actual emergency, they will know what steps to take. A program with the theme "*Be Prepared: It's Your Responsibility*" was also delivered to grade 8 students. This included smoke and carbon monoxide alarm awareness, kitchen fire safety, emergency preparedness as well as an overview of Sault Fire Services in relation to services and positions within the department. Both elementary programs were delivered to over 3,000 students.

Secondary School Program

In 2023, three different presentations were delivered to local high school students. This included Kitchen Fire Safety in Foods & Nutrition courses, Fire Service Recruitment for Careers courses, and Fire & The Law for grade 11 & 12 law courses. Over 500 students participated from our local secondary schools.

Fire Prevention Week

The theme for Fire Prevention Week in 2023 was "*Cooking Safety Starts with You.*" This year, Fire Prevention Week included a social media campaign, a radio campaign and recorded television commercials. Additionally, Sault Fire hosted two open houses at the end fire halls where families toured the stations and vehicles, practiced using a fire extinguisher, met Sparky, ate a BBQ lunch and learned about fire safety. The open houses were major successes with a total of 900 people in attendance.

CO Awareness Week

Carbon Monoxide (CO) Awareness Week is the first week in November every year. In 2023, Sault Fire had a social media campaign, a radio campaign and promotional ads on social media. The ultimate focus for Carbon Monoxide Awareness Week is to provide citizens with valuable information so that they can recognize the signs and symptoms of CO and help prevent CO related injuries and occurrences in the community.

Project ASAP

Project ASAP (Assisting Seniors Awareness Program) is a free program provided by Sault Ste. Marie Fire Services for seniors aged 65+. The focus of the program is to keep seniors safe in their own homes for as long as possible, with the idea of also making them feel confident and comfortable in their safety. The Public Education Officer will attend the senior's home annually and assess potential fire hazards, check and test smoke and carbon monoxide alarms and discuss a home escape plan. In 2023, 69 Project ASAP visits were conducted.

In-Service Smoke & Carbon Monoxide Alarm Program

Most fires happen at home, and history continues to show that working smoke alarms can make a difference between life and death should a fire occur. A critical program offered annually by Sault Fire is a door-to-door initiative in which suppression crews meet with homeowners, test their smoke and carbon monoxide alarms and provide valuable handouts regarding fire safety.

Over the course of the 2023 program, Fire Services crews visited over 2,700 homes and tested 3,014 smoke alarms with 2,888 passing. This resulted in a 96% compliance rate for those tested. Compliance rates are at an all-time high as the public has realized that personal fire safety remains their responsibility.

Other Programs

Sault Ste. Marie Fire Services is committed to keeping the community safe through various programs and initiatives. In 2023, these included group presentations for newcomers, seniors, and clubs, fire extinguisher training, community partner driven events, as well as parades and local festivals.

Inspection and Enforcement – The Second Line of Defence

Under 2.(1).a of the FPPA, the Fire Prevention Division is mandated to follow up on all complaints and request inspections. In doing so, officers routinely discover Ontario Fire Code infractions and issue compliance orders as a result. As life safety cannot always be achieved through public education, the next step to achieve compliance is through enforcement methods.

Despite the FPPA mandated inspection requirements, the Fire Prevention Division promotes community safety annually through proactive measures by performing daily routine inspections in all occupancies.

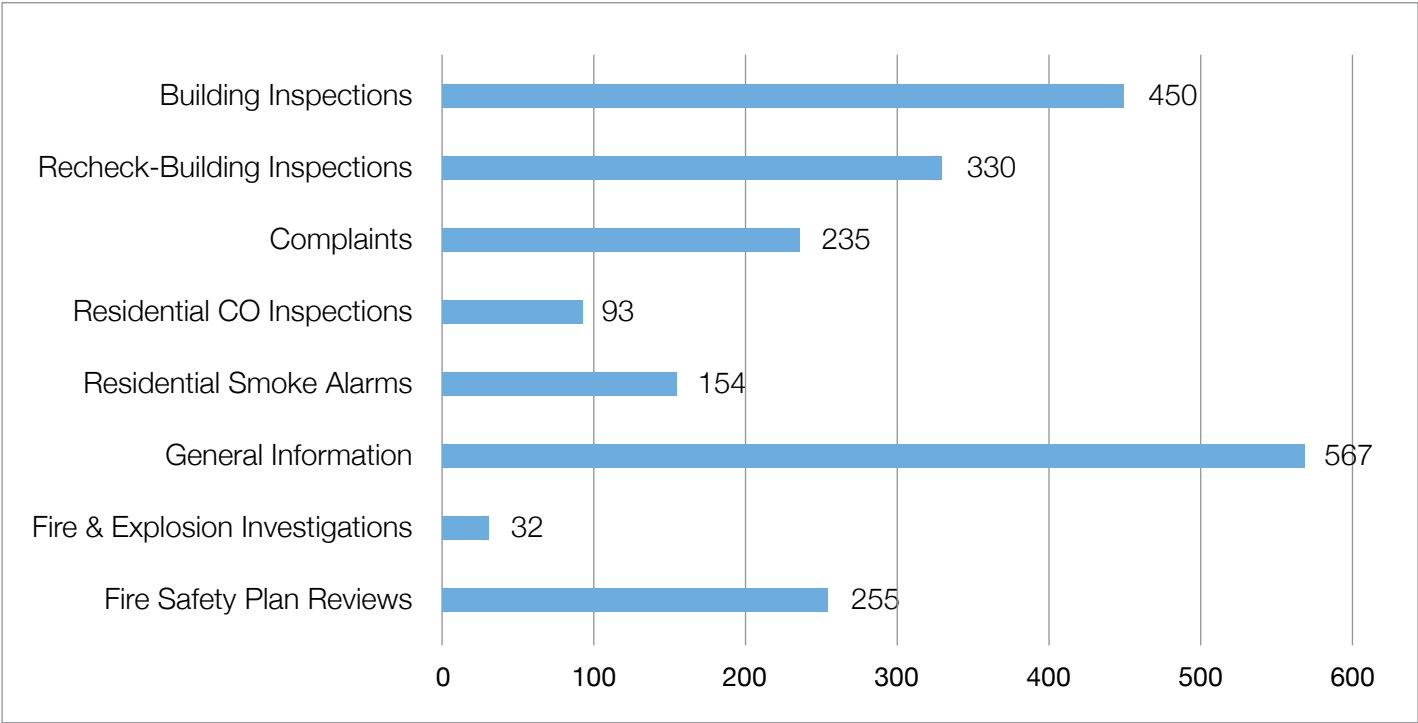

In 2023, substantive Provincial Offences charges resulting in hundreds of thousands of dollars in fines were levied against non-compliant building owners.

Additionally, the FPPA requires an annual inspection and fire drill of vulnerable occupancies which include long-term care homes, hospitals, retirement homes and some group living homes. In 2023, the Fire Prevention Division inspected all 40 vulnerable occupancies in Sault Ste. Marie, and all were compliant with the Ontario Fire Code.

FIRE PREVENTION & PUBLIC EDUCATION - continued

2023 Fire Prevention & Education Statistics

Looking Forward

To continue to help mitigate the risk of fire related injuries and fatalities in Sault Ste. Marie, key initiatives and strategies that promote safe cooking at home will remain a major focus of the Fire Prevention Division. Additionally, initiatives to promote the installation and maintenance of smoke and carbon monoxide alarms will also remain on the forefront.

The completion of a new Comprehensive Risk Assessment and Fire Master Plan is on the agenda for 2024 to ensure any new risks in Sault Ste. Marie are accounted for and mitigated against with a new plan of action.

Naomi Thibault

Deputy Chief
Fire Education, Prevention & Emergency Management

FIRE OPERATIONS

The **Fire Operations Division** is focused on the delivery of Emergency Fire Protection, Emergency Medical Care and related emergencies to the residents of Sault Ste. Marie. The Fire Operations Division is comprised of Suppression, Training, and Support Services personnel. Our goal is to provide quick and efficient emergency service in a compassionate manner.

Sault Ste. Marie Fire Services' (SSMFS) primary response objectives coincide directly with our Mission Statement - "The Sault Ste. Marie Fire Service is a proud partner within our community that provides exceptional service through Prevention, Education, Protection and Wellness".

Our highly trained professional firefighters are equipped with modern fire apparatus and equipment and are located at four stations throughout the municipality. In 2023, the Fire Suppression Division responded to 2,254 alarms, 13 of which were significant fires that resulted in a loss of more than \$100,000.

The quick actions of our Fire Operations crews limited the damage and property loss to these incidents. The Sault Ste. Marie Fire Service strives to meet the NFPA Standard of

responding in four minutes or less 90% of the time to mitigate the property loss to the community.

Sadly, in 2023 there were three fire-related fatalities. There were also two firefighter, and eight civilian injuries reported. This is a slight rise in fire fatalities and a decrease in both firefighter and civilian injuries over the previous year. Moving forward to 2024, our goal will be to continue our efforts toward achieving zero deaths and fewer injuries.

Achieving this goal of zero fire-related deaths and fewer injuries is directly related to our commitment to the "In-Service Smoke Alarm Fire Safety Program", in addition to our preparedness through training. The annual program is conducted by firefighters as part of the SSMFS Public Education Program in conjunction with our Fire Prevention Division. Over the spring and summer months, our Fire Operations crews conduct regularly scheduled visits to various residential areas of the community. Fire Suppression personnel provide the public with resources and information on carbon monoxide and home fire safety. In addition, smoke and carbon monoxide alarm checks are conducted to ensure that residents are compliant with Ontario Fire Code regulations and requirements.

Training (Education and Skills)

Over the course of 2023, Fire Suppression personnel recorded a total of 24,787 training hours or an annual average of 310 training hours per individual. These hours are accumulated by crews within a formal training format, group/crew training, and individual training.

The following is a list of some of the areas that Fire Operations personnel train in:

- Ice/Water Rescue
- Officer Training
- Vehicle Extrication
- Operating Guideline and Notice Review
- Fire Dynamics and Modern Fire Behaviour
- Occupational Health and Safety
- Firefighter Rescue
- Pumper Operation
- First aid and CPR Training
- Fire Apparatus Driver Training

FIRE OPERATIONS - continued

Sault Ste. Marie Regional Training Centre

With the closure of the Ontario Fire College (OFC) in Gravenhurst, Ontario, a new training delivery model was required. The OFC sought to modernize Fire Services' training through several modes, including online and blended courses, Regional Training Centers (RTCs) and Learning Contracts. With the approval of Council, SSMFS applied to and was approved by the OFC to develop a Regional Training Centre in Sault Ste. Marie. This provides the ability for staff to complete required courses in a cost-effective, timely manner by allowing a larger number of our staff to attend with no travel expenses.

In addition to in-house training, which carries on throughout the year, firefighters will continue with NFPA certification courses. SSMFS will be facilitating NFPA certification courses, which are open to not only our department, but all departments in the province.

Changes in 2023

The Operations Division saw several changes and advancements in 2023. Some of the highlights are:

New Hires

Council approved the hiring of four new recruits to bring the total number of suppression firefighters to 80.

New Apparatus

Fire Services received the new rescue unit in 2023 and is awaiting the arrival of the new aerial truck. Members of management and the association are also in the process of purchasing new pumpers to replace the existing apparatus.

New Certifications

The province has set a minimum certification program for all municipal fire services. A few examples of the programs are technical rope rescue, auto extrication and communication room/dispatch. The Sault Ste. Marie Fire Service is coordinating with the OFC to complete all certifications in a timely manner ahead of the proposed deadlines.

Operations Division

The Operations Division looks forward to seeing where the fire service is headed and what the day-to-day challenges are that we may face. In fire suppression, we have re-instated a few programs within the department and are working diligently to bring the entire department up to date.

New people in various leadership positions have fostered exciting times and generated a newfound enthusiasm to reach and maintain our goals.

In conclusion, I would like to welcome all the new recruits and thank all members of Sault Ste. Marie Fire Services for their commitment and dedication to protecting the lives, property, and environment of the citizens of Sault Ste. Marie.

Mike Oliverio

*Deputy Chief
Fire Operations*

SUPPORT SERVICES

COMMUNICATIONS

This crucial area carried out some important upgrades and regular maintenance during 2023.

- All portable and mobile radios underwent annual maintenance and upgrades.
- Radio infrastructure upgrades were completed. The new digitally encrypted P25 radios mean scanners will not be relevant anymore. P25 radios are the top of the line for durability and there is no other equipment on the market today that will surpass this.
- Support Services is working in conjunction with personnel from Bell 911, CriSys, Algoma Telephone Systems, SSM IT department and Sault Ste. Marie Police Service in the budgeting and mechanical and engineering design aspects of the rapidly approaching NG-911 system implementation target date.
- Our current PA system is in the process of being updated from analog to a digital Avtec Scout dispatch console for compatibility and operational purposes.

SUPPORT SERVICES - continued

MECHANICAL, VEHICLE AND BUILDING MAINTENANCE

Support Services plays a vital role in many different aspects of the daily running of Fire Services.

A few of the major projects worked on during 2023 were:

- To comply with industry standard best practices and increase the health and safety of all personnel, the fourth wave of mechanical lockouts with electrical interlocks were placed on an additional four overhead doors at various halls.
- Access control systems have been upgraded for personnel safety which limit access to approved personnel to SSM Fire Services secured buildings and allow proper programming of access cards from two different locations.
- Construction of the women's washroom facility at #3 Fire Hall was completed and outfitted with new lockers and benches.
- Duct cleaning at #2 Fire Hall was completed to reduce recirculated airborne particles and prevent pollutant buildup.
- With an incentive from Enbridge, Tancred Street #1 Hall had an air exchange unit replaced with a high efficient unit to help reduce carbon emissions which SSM Fire Services aims to meet Ontario's emission reduction targets.

Support Services personnel continue to ensure both Fire and EMS growing fleets, as well as all equipment used throughout Sault Ste. Marie Fire Services is ready 24 hours a day. A preventative maintenance program ensures that the regular servicing of all equipment and buildings is completed to control costs and ensure equipment availability and reliability.

- Fuel pump stations at #1 Fire Hall and #4 Fire Hall passed annual inspection with minor repairs. The tanks at #1 Fire Hall have been cleaned and painted thanks to suppression personnel.
- Gas fire furnaces (EOL) at #1 and #2 Fire Halls have been replaced with highly efficient furnaces to cut maintenance costs and reduce the City of Sault Ste. Marie's carbon footprint.
- Support Services' designated Fleet Motor Vehicle Inspection station license was renewed to allow for vehicle inspection/certifications and repairs. Communication with Parsons for the new DriveOn program has been ongoing to ensure Fire Services meets the 2024 program qualifications.
- Annual safety inspections were completed as per MTO guidelines.
- ULC/NFPA guidelines were used to test all aerial and ground ladder equipment as well as to complete the annual pump testing of all fire trucks with pumping capabilities.
- The new Rescue truck final inspection passed, and the unit was delivered to SSM Fire Services in September of 2023.
- The new Aerial has been tendered and awarded. The chassis is in queue for the assembly line with the body specs ongoing to ensure SSM Fire Services' requirements and expectations are achieved. This new Aerial expected delivery is late 2025.
- New updated equipment has been added to the fleet. The two frontline units, Platoon Chief and UT1 have been added and fitted to SSM Fire Services' requirements. The two old units have been repurposed for Fire Services' daily operations as backup units. The old PC1 is now part of the Support Services fleet. UT1 is now FP7 in support of Fire Prevention inspections. S3 is used for service calls and support for suppression.

- Fire Prevention has purchased and received four new FPO vehicles. These vehicles have been outfitted for everyday inspections.
- In our smaller fleet, a gas-powered snow blower has been replaced with an electric version with recognition to the SSM Environmental Sustainability Committee in aiding the reduction of SSM Fire Services' carbon footprint.

TRAINING

- Support Services works in conjunction with the Training Division to ensure all personnel are up to date with the large variety of equipment and tools.
- Support Services monitors that all employee government required licenses are current.
- Support Services staff regularly attend EVT training courses and testing at Canadore College, Spartan Technical Emergency Vehicle Technicians and Cummins Canada. This training has certified SSM Fire Services technicians to above standards as Emergency Vehicle Technician Certification.
- Support Services staff attend the advanced automotive electronic training program provided by Auto Aide Barrie Ontario, which improves the diagnostics of potential vehicle malfunctions.

I would like to thank all personnel at Sault Ste. Marie Fire Services for their assistance and patience while Support Services performs the required work and repairs. Recognition and appreciation go out to Mike Brock, Paul Charron and Jason Matthews for their professionalism, outstanding work ethic and dedication to Fire Services. Support Services personnel are a pivotal component of the success of Sault Ste. Marie Fire Services.

Matt Depatie

Assistant Fire Chief

EMERGENCY MANAGEMENT

Planning

In the past year, significant strides have been made in updating legacy planning documents within our emergency management program, considering valuable lessons learned and industry best practices. Notably, the Municipal Emergency Control Group and the Emergency Management Planning Committee have undergone revisions, including new memberships and updates to their mandates.

The Municipal Emergency Control Group serves as a linchpin in our emergency response efforts, shouldering the crucial responsibility of coordinating response and recovery operations at the local level. During times of crisis, this group assumes the pivotal role of directing and orchestrating the collective efforts of key stakeholders, spanning emergency services, municipal departments, governmental agencies, and community organizations. By fostering collaboration and coherence, it ensures a unified and effective response to emergencies.

In parallel, the Emergency Management Planning Committee focuses on the strategic aspects of emergency preparedness. Charged with the task of crafting and maintaining comprehensive emergency management plans, this committee lays the groundwork for a proactive and resilient approach to potential risks and hazards. By meticulously outlining procedures, protocols, and strategies tailored to diverse emergency scenarios, it fortifies the municipality's readiness to mitigate, respond to, and recover from adverse events.

Public Education

In 2023, the Neighbours Helping Neighbours Grant was launched. This program aims to build social capital and resilience within communities by fostering connections among neighbours. It recognizes that in times of disaster, immediate help often comes from those nearby. The program provides grants to local neighbourhoods hosting events to promote connections and resilience.

Several community projects were undertaken in various neighbourhoods, each aiming to foster connections and build stronger communities. In Crestwood Avenue, neighbours organized a summer block party supported by grant funding, which also facilitated the donation of a lending library by The Piper Project. The event provided an opportunity for new residents to integrate into the community and highlighted the welcoming atmosphere of Crestwood. Similarly, Jamestown Sal's Summer Kids Day, organized by Jamestown Strong, offered a fun-filled day of activities, food, and camaraderie, reinforcing the sense of community spirit. In Highcrest and Northridge neighbourhoods, residents came together for an annual block party, sharing meals, planting seeds, and strengthening bonds. Meanwhile, in Alworth Place, a mini-community organized a backyard gathering focused on environmental initiatives, such as planting a pollinator garden and raising funds for St. Vincent Place through a yard sale and bake sale. Woodward Avenue celebrated inclusion and neighbourly connections with a barbecue and

group walk to watch fireworks, fostering a sense of unity and preparedness for future emergencies. Finally, the Greenfield Subdivision Christmas Celebration combined festive cheer with community support, including a parade, barbecue, and food drive for the Sault Ste. Marie Soup Kitchen, showcasing the tight-knit nature of the neighbourhood and its commitment to helping others.

Through grassroots initiatives like Neighbours Helping Neighbours residents are empowered to take ownership of their well-being and preparedness, while strengthening social ties and networks within neighbourhoods. By promoting inclusivity, sustainability, and collective action, the program contributes to creating healthier, safer, and more connected communities. Moving forward, we will continue to support and invest in neighbourhoods as they play a crucial role in building stronger, more resilient communities capable of facing the challenges of the future.

Training and Exercises

In 2023, the Emergency Management Division facilitated a busy schedule of training and exercises, with seven courses conducted in collaboration with various stakeholders. Additionally, the division actively engaged or led six tabletop exercises, which are valuable tools used to simulate emergency scenarios and assess response strategies. These exercises provide participants with a controlled environment to discuss and analyze potential challenges, identify strengths and weaknesses in existing plans, and enhance coordination among key stakeholders. By simulating realistic scenarios and testing response procedures in a low-stress setting, tabletop exercises help improve readiness and preparedness for real-life emergencies. The collaborative approach to training and exercises underscores the commitment of the Emergency Management Division to continuously enhance capabilities, build partnerships, and ensure effective response to various threats and hazards.

Looking ahead, we remain committed to continuous improvement and collaboration in all aspects of emergency management. By investing in planning, public education, and training, we strive to build a community that is resilient, connected, and prepared to face whatever challenges may arise in the future.

All the Best,

Lauren Perry

Community Emergency Management Coordinator

2023 HONOURS AND AWARDS

Congratulations to the following Fire Services personnel who achieved special recognition in 2023.

FIRE SERVICES EXEMPLARY SERVICES
