These percentages were not just for officers – they included civilian staff also. In 2024 we added 8 more civilian staff and in 2025 we added 12 more. This is why 2025 is higher.

Yes, but more specifically the question was, why did the 2024 budget have a 5.42% increase for salary and complement increases for 4 officers, but the 2025 budget has a 6.4% for salary and complement increases, but it is only for 3 officers.

So even though fewer officers are being added this year, the percentage increase is higher.

I'm not 100% sure what she was asking after the explanation provided already.

I believe it was the cost of 4 constables in 2024 versus 3 officers in 2025.

4 officers in 2024 are approximately \$581,662

3 officers in 2025 are approximately \$447,221
