SAULT STE. MARIE

Description of Work:

A written description of the work to be undertaken along with any conservation methods, including such details as the materials to be used, measurements, paint colors, decorative details, and if any of the heritage attributes will be affected by the construction. If applicable, attach plans and elevation drawings, site plans and dimensions.

New Construction:

We are looking to put a small roof over the back man door to prevent ice from falling on people coming in or out of the building. This is for the warehouse that is attached to the heritage building and this building was built in 1974. The work that is being done is at the far back of the property approximately 60 feet from the heritage building. There is no heritage designation for this part of the building. Basic building materials including wood, shingles (either black or dark brown) and whatever it takes to fasten it together. At this time, I have no sight plans, drawings or specific dimensions only that it will be big enough to cover a 36" door. I am looking to have this done in early spring.

Alteration:

We are also looking to do some work to the roof of the warehouse (circa 1974). We are looking to cover the metal roof on one side (right side if looking towards the building) with the left side of the roof being done another year (due to cost). This will include insulation between the corrugated metal roof area with insulation and a membrane roof covering over top. I would like approval on the full roof being done regardless of what year we are doing it. Again, there is no heritage designation on this part of the building. This is for safety issues that are affecting the people parking on both sides of the warehouse. I will attach the quote from Maverick and Sons for the roof.

The work that is being done is for safety reasons so my hope is that this will be approved especially as it is not a part of the heritage building itself, only the attached building.

238 Queen Street East

Attached are a couple of photos of the building that I am looking to put a full roof on (approximately 60' x 60') as well as the man door that I am looking to put a small tent like roof above the door where the SK Group Shipping and Receiving sign is.

The structure does not have any heritage value and is located behind 234 Queen St. E. building (part of SK Holdings property).

This is being done for safety reasons.
